

# DIAM TOKENOMICS

The background of the entire page is a digital illustration of a space lander on a red planet. The lander is white with red and black accents, featuring the word 'SUNRISE' and the number '02' on its side. It is supported by four landing legs. Two astronauts in white suits are visible near the lander. In the distance, another lander is visible on the horizon under a starry sky.

## Reimagining the Future of Finance

Diamante Net by DiamCircle is a hybrid ecosystem with affinity towards digital finance. Discover, build and fuel today's innovations for tomorrow's digital infrastructure.

# DIAM Distribution

## Advisors (3% - 300 million DIAM)

**Specialized Roles:** Clearly defined roles for advisors (e.g., technical, business development, regulatory) with corresponding vesting terms tailored to the advisory capacity. Advisors' tokens will vest linearly over 48 months, aligning their long-term advisory roles with the ecosystem's growth, with no initial cliff to facilitate immediate engagement and reward.

**Engagement Bonuses:** Bonus token releases for advisors who facilitate key partnerships, technological breakthroughs, or significant ecosystem enhancements.

## Venture Round (4% - 400 million DIAM)

**Co-investment Opportunities:** Providing venture round participants with co-investment rights in ecosystem projects funded by the Ecosystem fund, fostering deeper investment in the platform's success. Targeting venture capital and institutional investors who are aligned with the DIAM ecosystem's vision and can contribute to its scaling and adoption.

## Private Sale (10% - 1.0 billion DIAM)

**Strategic Tranches:** Sale structured in tranches with differing vesting terms to prioritize long-term strategic partners over short-term financial contributors. Private sale tokens will vest over 10 months with an initial cliff period for 6 months, attracting early investors who can provide more than capital, such as strategic support and networking opportunities.

## Team (12% - 1.2 billion DIAM)

**Incremental Vesting:** The team's allocation will be subject to a linear vesting period of 48 months. This ensures the team's long-term commitment to the project's success without an initial cliff period, promoting gradual integration of tokens into the market.

**Performance Milestones:** Introduction of performance based token releases to align team incentives with ecosystem milestones and user growth targets.

## Foundation (16% - 1.6 billion DIAM)

**Fiduciary Responsibility:** Establishment of a multi-signature wallet with oversight from a board of trustees, to manage these funds. Reserved for the foundation to oversee the project's governance, fund ongoing development, community initiatives, and operational costs, ensuring the project's adherence to its mission and vision.

**Earmarked Reserves:** Managed with full transparency and regular disclosures to the community about fund utilization and project progress.

## Ecosystem (20% - 2 billion DIAM)

**Sub-funds:** Division into sub-funds targeting specific ecosystem needs: developer grants, community events, liquidity provisioning, and new project incubation, each with its governance model. Allocated for ecosystem incentives, developer grants, and partnerships, this fund supports projects and initiatives that drive the adoption and utility of the DIAM platform.

# Public Sale (35% - 3.5 billion DIAM)

**Access:** Designed to ensure wide distribution and fair access, with individual participation caps to prevent token concentration and encourage a diverse holder base. Tokens purchased in the public sale can be immediately used within the ecosystem, fostering early adoption and utilization of DIAM's utilities.

**Community Allocation:** Reserved portion of the public sale for community members with proven engagement to ensure loyal supporters are rewarded.
